

dBs BERLIN MUSIC

Music Production Summer School

Overview

Spend 6 inspiration-filled weeks developing practical tools, skills and essential techniques in music and audio production during our innovative and dynamic summer course.

At the end you'll walk away with a portfolio of pieces from our exciting workshops as well as an arsenal of practical tools and methods to carry with you into the future. And if at the end you find yourself hungry for more, we offer seamless progression from the summer school into either our Electronic Music Production & Performance course or the Creative Music Production & Sound Engineering course which both start in September.

Workshop Details

Studio Workshops

Get hands-on experience in our fully equipped recording studio with professional guidance from experienced tutors:

- Developing foundational skills in sound engineering
- Exploring the principles of studio space recordings
- Building and finalising full tracks layer by layer with real musicians
- Exploring the creative possibilities of the mixing console
- Collaborating on projects
- Recording your own music in a real studio environment
- Sharpening your listening skills

(continued on next page)

Software and Hardware

From the basics to the experimental, the Software and Hardware Workshops cover all you need to get you started on your tracks:

- Working with different digital audio workstations (DAW)
- Recording audio and midi
- Arranging and forming tracks
- Effects and processing
- Mixing and Mastering Basics

Creative Workshops

The Creative workshops give you a chance to learn 'out of the box' production methods with expert guidance with an extensive array of hardware on hand to help you let your imagination run wild:

- Programming digital and analogue synths
- Working with drum machines and sequencers
- Experimenting with sound manipulation and effects
- Using physical space
- Glitching audio

Feedback Sessions

Share your productions-in-progress at our weekly Feedback sessions where you can find new perspectives from your fellow participants and start exciting new collaborations.
